SAS training programme conducted at ICAR-DGR

A three day in-house training programme on 'Using Statistical Methods for Agricultural Research through SAS Programme' was successfully organized during 14-16 September, 2017 at ICAR-Directorate of Groundnut Research, Junagadh. A total of 24 participants including scientists, technical officers and research scholars have participated in the programme. The programme was inaugurated at 10.0 AM on 14/09/2017 by Director, ICAR-DGR, Junagadh. Dr Suseel Sarkar and Sh. RS Tomar were invited from IASRI, New Delhi as resource persons. After registration of the participants for the programme, the session was started with the lecture on the overview of the SAS programme and its complete installation by Sh. Tomar. Later, the basics of statistics and the use of SAS programme statistical computation were elaborated by Dr Sarkar. On 15/09/2017, a day long interactive session was carried out regarding the design of experiments; and their subsequent analysis and interpretation using SAS programme. On 16/09/2017, the day was started with the installation of JMP genomics module and its use in statistical analysis. Further, the use of SAS enterprise guide and Indian NARS Statistical Computing Portal were elaborated by the resource persons. Later the valedictory session was held at 12.30 PM which was chaired by the Director, ICAR-DGR where the active participation of the trainees was highly appreciated by both the resource persons. The director congratulated the Course Director Dr Ram A Jat and his team for making the training successful and also assured for arranging such trainings in future. The programme was concluded by the vote of thanks.
